

Take Your EOP Out of the PDF.

Build, maintain, govern, and share your Emergency Operations Plan in one connected digital workspace.

EOP Builder helps schools and districts transform static emergency plans into living, connected preparedness tools.

BUILD

Create a comprehensive, standards-aligned EOP with ease.

MAINTAIN

Keep your plan current with built-in workflows and version control.

GOVERN

Assign roles, manage access, and ensure accountability.

SHARE

Securely collaborate with internal and external partners.

Why EOP Builder?

Turn a static emergency plan into a living, connected preparedness resource.

Traditional EOPs often live in binders, PDFs, or shared folders—making them difficult to update, govern, and use in the moments that matter most. EOP Builder helps schools and districts centralize, maintain, and share their emergency operations planning information in one connected digital workspace.

Static documents

Replace hard-to-manage PDFs and paper binders with a digital plan that is easier to access and maintain.

Scattered information

Bring procedures, annexes, contacts, sites, maps, and resources into one organized environment.

Difficult updates

Make changes faster, manage reviews more easily, and keep the right version in circulation.

Disconnected coordination

Prepare to collaborate more effectively with connected public safety partners.

Take your EOP out of the PDF and make it an active part of preparedness.

What schools gain

A more organized planning process

Better visibility into plan content

Simpler maintenance and governance

Faster access to critical information

A stronger pathway to collaboration

Key Capabilities

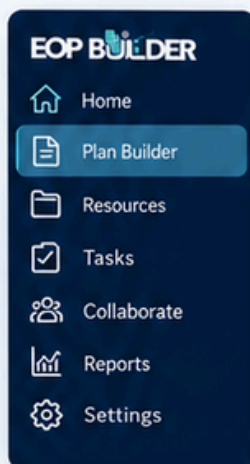

Build, maintain, govern, and share your Emergency Operations Plan in one connected digital workspace.

Plan Creation & Organization

- ✓ Build digital EOP content in a structured workspace
- ✓ Organize sections, annexes, procedures, hazards, and roles
- ✓ Centralize contacts, facilities, and supporting resources
- ✓ Move beyond disconnected documents and folders

Maintenance & Governance

- ✓ Keep plans current with easier updates and ongoing maintenance
- ✓ Support review workflows and team accountability
- ✓ Improve version control and publishing discipline
- ✓ Help ensure stakeholders are working from the right information

Plan Version History

- Version 3.2** Current

Policy updates and contacts
- Version 3.0**
Aug 28, 2023
Initial digital plan

Agency Connection

- ✓ Connect with eligible public safety agencies through CrisisGo Connect
- ✓ Create a stronger pathway for sharing approved preparedness information
- ✓ Support more informed coordination with law enforcement, fire, EMS, and emergency management
- ✓ Strengthen preparedness before an incident occurs

Preparedness in Practice

- ✓ Make critical plan content easier to access when needed
- ✓ Support training, planning discussions, and readiness efforts
- ✓ Create a more usable and actionable planning foundation
- ✓ Bridge the gap between planning and operational readiness

Emergency Operations Plan

From static plan to living plan

Build

Create a comprehensive, standards-aligned EOP with ease.

Maintain

Keep your plan current with built-in workflows and version control.

Govern

Assign roles, manage access, and ensure accountability.

Share

Securely collaborate with internal and external partners.

How It Works

A simple path from planning to connected preparedness.

Access & eligibility

EOP Builder is the free preparedness and agency-connection entry point into the Community Safety Network. Schools maintain free access by establishing at least one accepted, verified eligible public safety agency connection.

Why schools start here

- ✓ Modernize emergency planning
- ✓ Improve usability and maintenance
- ✓ Create a stronger planning foundation
- ✓ Support connected community preparedness

Take your EOP out of the PDF.

Build a more connected, more usable emergency planning foundation with EOP Builder from CrisisGo Connect.
