How do you envision your safety platform?

What if your Emergency Alerting Tools could:

• Ensure that every staff member received an audible alert.
• Instantly send and receive safety messages on mobile devices and smartphones.
• Provide a panic button for help in isolated incidents.
• Escalate emergencies alerts to first responders.
• Offer a unified communication channel to coordinate and resolve the situation.

What if your School Safety Drill Management System that could:

• Create customized safety drill schedules for every building in your district.
• Provide pre-drill and post-drill reports to prepare for drills and review data.
• Simplify the process of reporting drills to meet state requirements.

What if your Emergency Response Tools could:

• Empower staff with immediate access to their emergency plans.
• Quickly account for all staff and students.
• Guide staff and students to safety with digital maps and safety documents.
• Simplify the process for reunifying students with their parents.

What If Your Student Safety Resources could:

• Provide students with a specialized student safety app.
• Help students discreetly report harassment and bullying.
• Share safety practices and build awareness.
• Allow students to report their safety status during emergencies.
• Provide students with GPS location sharing capabilities.

No need for "What Ifs"

Your school district CAN do all this through CrisisGo's comprehensive safety solution CrisisGo's platform helps prevent emergencies before they start, and it gives districts everything they need to manage a crisis from the start of an incident to its resolution.
